JAC OF ALL TRADES

*Please note that specifications are subject to change and these instructions may no longer apply. Please contact the JAC team if you have any questions on this guide.

LET'S GO:

The JAC T9 is loaded to the brim with loads of tech & spec! This is a quick guide to get your started. Still got a question?

- Head to the glovebox and find your Owners Manual
- Visit www.jac.co.nz/owners-info for video tutorials
- Chat to your local JAC team

DRIVE MODES + 4WD SELECTOR:

The T9 has four drive modes: NORMAL, ECO, SNOW & SPORT. Select these using the button next to the gear selector. It also has 4WD on the fly. To engage and disengage 4 Low you will need to come to a stop & put the vehicle in neutral.

KEEP THAT PIE WARM, OR KEEP THAT CAN OF LIQUID ENERGY COOL...

Most importantly, the JAC T9 has a hot/cool box in the centre console. This runs off the Air Conditioning/Heater system. To use the box:

1. Open the lid/arm rest to the centre console and make sure that the dial is turned to the 'open' position.
2. Set the Air Conditioning to your desired temperature & select the flow to the 'main body' only, the air will flow into the box.
3. To speed up the cooling/warming of the box you may wish to close the vents on the cabin to direct most of the air into the box.

Please note that the function isn't designed to 'cook' a pie from cold, but it'll keep it nice & toasty for you!

APPLE CAR PLAY/ANDROID AUTO:

To use these; insert your phone charger cable into the left most USB plug located under the touchscreen. Connect your phone and follow the normal instructions to activate.

CHANGE THE VOLUME ON THE SCREEN:

Swipe down from the top of the touchscreen to access the volume controls, also avail on the steering wheel.

SAFETY FEATURES:

The JAC T9 Ute is loaded with safety features... 27 to be exact! 18 of these are ADAS (Advanced Driver Assistance Systems). Sometimes you may want to turn these off. To achieve this:

1. Press the '**Home'** icon on the touchscreen (found at the bottom in the centre)
2. Swipe from right to left to access the menu
3. Select **'Vehicle Setting'**
4. Select the menu for either **'Driving'** or **'Assistance'**
5. Adjust the settings as desired

*ADAS features are designed to assist the driver. You must remain in control of the vehicle at all times.

QUICK DMS TURN OFF:

The Driver Monitoring System (DMS) will alert you when your focus shifts from the road. The T9 has a quick turn off button for this:

1. Swipe down on the touchscreen
2. Tap the top right icon (a face)
3. Confirm to turn off the function

A STEERING WHEEL CONTROL TIP

- To change the song or station, long press the volume +/- buttons
- To edit the cruise control speed by increments of 1, long press the +/- buttons

TOWING:

The JAC T9 has a 3.2T braked, & 750kg un-braked capacity.

The T9 is equipped with a Trailer Mode. This mode will adjust the vehicle settings for towing. After connecting your trailer a prompt should automatically show on the touchscreen. Or, to manually access:

1. Swipe down from the top of the touchscreen
2. Select '**Trailer Mode'**
